Objective

To obtain a Software Engineer position that aligns with my technical skills, where I can utilize my experience and knowledge of modern front-end and back-end technologies to contribute to the development of high-quality software.

Skills

- Languages: JavaScript (ES6+) / TypeScript | HTML, CSS
- Frameworks/Libraries: React(Router, Hooks, HOC) / Next.js(NextAuth, tRPC, TanStack, Blitz)
- State APIs: Redux(saga, toolkit, thunk), React Context, MobX, React Query, SWR, Jotai, Zustand
- BE: Node.js, Express, WebSockets(Socket.io), REST API, GraphQL(Apollo client/server), Axios, Prisma, Railway, Supabase
- AWS: Lambda, API Gateway, DynamoDB, EC2, Cognito, Serverless, Amplify
- Testing/Tools: Unit-testing Jest, Enzyme, React Testing Library
- CSS Frameworks/Libraries: Material-UI, Styled-Components, Bootstrap, Tailwind, daisyUI
- 3D/Animations: Three.js, react three fiber/drei, GSAP, Framer motion, AutoAnimate
- Tools: VSCode, Git, npm/yarn/pnpm, Babel, Webpack, Vite, ESLint, Prettier, Postman, Insomnia, Swagger
- Methodology: Agile/Scrum (Jira, Trello)

Professional Experience

Senior Frontend Engineer   02/2022 - present
NDA. E-commerce project, Germany
The company's main business is the development of different types of home appliances, from complex smart-house devices to common-use gadgets.
- Led the development and maintenance of Content Management System (CMS) platforms to cater to the needs of distinct company departments.
- Executed comprehensive multi-device accessibility enhancements, resulting in a substantial enhancement of the overall UI and UX across diverse screen sizes and devices.
- Led the creation of a cross-domain platform with a completely revamped UI/UX, adhering to industry best practices and methodologies for managing business logic and client-server data flow. This strategic initiative resulted in a noticeable boost in performance and the establishment of a more predictable and consistent user experience.

Middle Front-end Engineer   07/2020 - 01/2022

NDA. SaaS platform, Argentina

Client is the pioneer and market leader in Experience Management.

The client develops an award-winning SaaS platform, the Experience Cloud, which leads the market in understanding and managing experience for customers, employees, and citizens.

- Developed microservices using React and JS/TS in a project employing tools like Redux, TypeScript, NodeJS, GraphQL, and more.
- Created dynamic views for company data and analytics, maintained and enhanced existing code, and ensured code quality.
- Collaborated with a team of 30, using design patterns and OOP principles. Utilized internal libraries for complex component creation.
- Followed and adhered to all the best practices of the development cycle processes while building top enterprise services.

Front-end Developer   10/2019 - 06/2020

Bodyvic. Healthcare project, Ukraine

- Worked on transitioning a legacy project from JQuery to Next.js
- Implemented new features and improved core UI components
- Collaborated with the team to develop optimal architectural solutions for scalability, flexibility, and maintenance of the codebase.

Web developer   12/2018 - 09/2019

Self-employed, freelance

- Designed and improved markup layouts based on client-specific requirements

Education

Gromcode online University (full time)   05/2018-11/2018
Front-end Developer React

ITVDN platform (part-time)   03/2018-12/2018
JavaScript | HTML | CSS
